- Generating heat and steam with separated controlling system
- Easy to move and install in different places.
- Reducing water and electricity consumption in comparison with old and traditional types
- Generating more steam in Lower temperature than Super-hot models (Element models, steam boiler models &...)
- Include Digital, Easy operation and high-speed process control panel
- minimal maintenance required
- Possibility to install outside of fermentation room in order to not occupy the interior space of fermentation room which reduces the depreciation of device
- Automatic discharge and washing system for steam generator tank
- The significant effect on bread quality and Reducing bread's waste
- Reducing maintenance cost compared to Indoor Models(=minimal maintenance required)

| Specification | ABDIS E |
|---------------------------------|-----------|
| Maximum Temperature (°c) | 45 |
| Maximum Humidity (RH%) | 95 |
| Capacity (m ³ /unit) | 10 |
| Dimensions (W×D×H)(cm) | 60×21×196 |
| Power (kw) | 6.5 |
| Weight (kg) | 83 |
